Halloween kit card for fun, or giving away.

Snap the pieces together and move the lever back and forth to make the spooky creatures perform a funny Halloween dance!

Print Settings

Printer:

HyperCube300

Rafts:

No

Supports:

No

Resolution:

0.2

Infill:

25%

Filament: Hatchbox PLA Green, Black, White, Orange

Notes:

Halloween Party 1 is the base with gears. Halloween Party 2 is the house, gates and extra critters. Halloween Party 3 is the dancing monsters. I made mine in green, black and white, but you can choose whatever colors you like best.

Cut out all parts, then snap large gears into the larger places on the base. The small gear with lever goes on the open side (right). Haunted house fits in the back and the fences fit in the front if desired. Monsters fit into the large gears. Extra creatures may be placed wherever you find the most fun.

Move the lever back and forth to make the creatures dance!

I will add instructions as time allows.
